

Michael Carter

.NET Backend Engineer

michael.carter@email.com | (555) 214-7788 | Austin, TX | linkedin.com/in/michaelcarter-dev

SUMMARY

Backend Engineer with 7+ years building scalable, high-throughput services in C#/.NET across finance and e-commerce platforms. Deep expertise in microservices architecture, distributed systems, and cloud-native deployments on Azure and AWS. Track record of reducing latency, improving reliability, and mentoring engineering teams.

CORE SKILLS

Languages	C#, .NET 8/6, T-SQL, PowerShell
Frameworks	ASP.NET Core, Entity Framework Core, gRPC, MediatR, Dapper
Architecture	Microservices, CQRS, Event-Driven Design, Domain-Driven Design (DDD)
Cloud & DevOps	Azure (App Service, Functions, Service Bus), AWS, Docker, Kubernetes, Azure DevOps, GitHub Actions
Data	SQL Server, PostgreSQL, Redis, Cosmos DB
Testing	xUnit, NUnit, Moq, Postman, integration/contract testing

PROFESSIONAL EXPERIENCE

Senior .NET Backend Engineer — Northgate Financial Systems

Mar 2021 – Present | Austin, TX

- Led migration of a monolithic .NET Framework payment platform to .NET 8 microservices, cutting average transaction latency by 42%.
- Designed event-driven architecture using Azure Service Bus and MediatR, decoupling 12 downstream services from the core order pipeline.
- Implemented CQRS with EF Core and Dapper for read/write segregation, improving reporting query performance by 5x.
- Established CI/CD pipelines in Azure DevOps with automated integration testing, reducing release cycle time from 2 weeks to 2 days.
- Mentored 4 junior engineers on clean architecture and unit-testing practices; introduced code review standards adopted team-wide.

Backend Engineer — Vantage Retail Group

Jul 2018 – Feb 2021 | Dallas, TX

- Built RESTful APIs in ASP.NET Core supporting a multi-region e-commerce checkout system handling 3M+ monthly transactions.
- Optimized SQL Server stored procedures and indexing strategy, reducing peak-hour query latency by 35%.
- Containerized services with Docker and deployed to Kubernetes clusters on AWS EKS, improving deployment consistency across environments.
- Implemented Redis caching layer for product catalog service, reducing database load by 60% during flash sales.

Software Engineer — Brightline Software Solutions

Jun 2016 – Jun 2018 | San Antonio, TX

- Developed internal tooling and reporting services in C# and SQL Server for logistics operations teams.
- Wrote unit and integration tests using NUnit, raising code coverage from 48% to 82% across core modules.
- Collaborated with QA to build automated regression suites, reducing manual testing effort by 30%.

EDUCATION

B.S. in Computer Science — University of Texas at Austin

Graduated May 2016

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate
- Microsoft Certified: Azure Solutions Architect Expert
